

Accession Number	Description	Dimensions	
2025.med.52.1	A section of bovine long bone. There are red marks on the top and side, marking out a plate	Height = 3.8 , Width = 4.5, Length = 13.7.	
2025.med.52.2	A section of bovine long bone with one face removed. The exposed surfaces are smoothly finished. There are red marks on both sides.	Height = 3, Width = 4.6, Length = 13.6.	
2025.med.52.3	A narrow, wedge-shaped section of bovine long bone. Exposed facets are smoothly finished.	Height = 1.2, Width = 1.2, Length = 9.8.	
2025.med.52.4	A cow bone bone plate whose shape is an elongated oval with pointed ends. It has three holes for screws. Its bottom surface is slightly concave.	Height = 9.5, Width = .4 Length = 2.3.	
2025.med.52.5	A cow bone bone plate whose shape is an elongated oval with pointed ends. It has four holes for screws. The word "GERMANY" is lightly inscribed in the surface. It is slightly shorter and narrower 2025.med.52.4.	Height = 9, Width = .4 Length = 1.7.	
2025.med.52.6	An cow bone intramedullary pegs with a central rims. The largest of a set of four.	Length = 5. Max diam = 1.	Small chips in central rim.
2025.med.52.7	An cow bone intramedullary pegs with a central rims. Second largest of a set of four.	Length = 4. Max diam = .8.	
2025.med.52.8	An cow bone intramedullary pegs with a central rims. One of two smallest of a set of four.	Length = 2.9. Max diam = .7.	
2025.med.52.9	An cow bone intramedullary pegs with a central rims. One of two smallest of a set of four.	Length = 2.9. Max diam = .7.	
2025.med.52.10	An cow bone bone screw. The screw has a blunt tip. At the head of the screw is a cylindrical element.	Length = 4.1 Max diam = .8.	
2025.med.52.11	An cow bone bone screw. The screw has a blunt tip. At the head of the screw is an element with a square crosssection, ending in a blunt tip.	Length = 4, Max diam = .7.	
2025.med.52.12	An cow bone bone screw. The screw has a pointed tip. At the head of the screw is an element with a square crosssection, ending in a pointed tip.	Length = 4.8, Max diam = .7.	
2025.med.52.13	An narrow cow bone bone pin. The pin has a pointed tip	Length = 5.4, Max diam = .15.	
2025.med.52.14	An narrow cow bone bone pin. The pin has a pointed tip	Length = 5.4, Max diam = .15.	
2025.med.52.15	An narrow cow bone bone pin. The pin has a pointed tip	Length = 5.4, Max diam = .15.	

2025.med.52.16	An narrow cow bone bone pin. The pin has a pointed tip	Length = 5.4, Max diam = .15.	
2025.med.52.17	An narrow cow bone bone pin. The pin has a pointed tip. This example is shorter than others in the collection	Length = 4, Max diam = .15.	
2025.med.52.18	An narrow cow bone bone pin. The pin has a blunt tip. This example is shorter than others in the collection	Length = 4, Max diam = .15.
